## Pleated line

Oscura is an indoor blind system for frontal application. It is characterized by the clutched movement of the pleated screen and by the reduced size of profiles. It is the ideal solution for oblique windows as it can be installed from 0° to 90° and the possibility to actionate it horizontally or vertically.

Darkening/Filtering screening

Dimensions must be communicated width x height in mm clearly stating if it is finished measure of the flyscreen or if it is the opening measure (door or window).

- ✓ Finished measure: the flyscreen will be supplied with the given sizes
- ✓ Window opening: the flyscreen will be supplied 2mm less than the given size.
