

Roll up line

Plana is an innovative design flyscreen especially designed for wide doors.

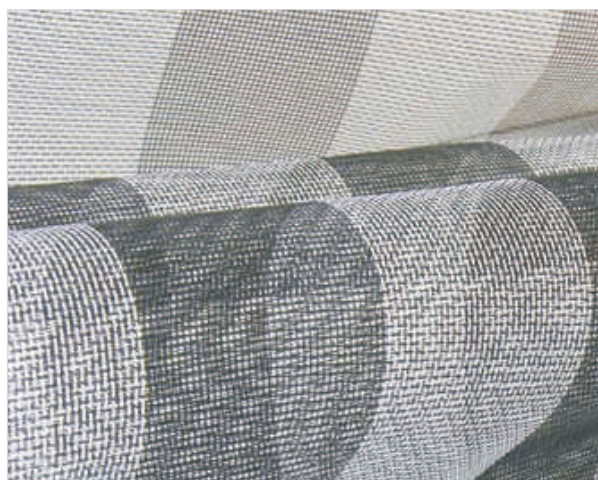

Very easy to install and dismantle, Plana guarantees the neatness of both the passage and the screen as the absence of lower guide facilitate transit.

Available in one shutter or two shutters with central magnetic closure.

Plana reversible version (by request) can be opened by both sides.

Roll up from:

right --> left
right <-- left

Black and white net

optional

Dimensions must be communicated width x height in mm clearly stating if it is finished measure of the flyscreen or if it is the opening measure (door or window).
